locations, get real-time updates for every checkpoint scanned on your guards' tours.

Report Incidents

Guards can report incidents on patrols straight to the management in real-time.

GPS Tracking Supervisors can view real-time

GPS locations of their entire mobile security team. TimeTec Patrol also provides searchable historical reports and shifts in specific GPS locations.

TimeTec Patrol Application for Guard Management

Data Collection & Monitoring

TimeTec Patrol automates data collection process with the use of NFC tags and TimeTec Patrol App during patrol sessions.

- · Eliminates mistakes, intentional errors & dishonesty in the system such as 'buddy punching'.
- · Reduces time spent on processing timesheet data.
- · Obtain transaction logs and user information using PUSH technology and automatically centralizes it in TimeTec Patrol.
- Provides access to real-time data monitoring features.
- · Allows offline patrol mode data to be captured, if no Internet connection is found. Patrol data will be sent to the server once connection is established.
- Send notifications to emergency contact persons, during an emergency by triggering the SOS button.

Guard Patrolling Management

TimeTec Patrol is flexible, easy to use, and is able to handle complex patrolling assignments.

- · Combines NFC-enabled Android phones with NFC tags for patrol check-ins.
- · Records all guards' tour times and locations, as they happen to ensure the patrolling jobs are carried out.
- Manages patrolling routes and checkpoints of your security guards.
- · Sends ad hoc requests to the on-duty guards to be carried out during tour easily.
- Allows security guards on-duty to report incidents instantly using TimeTec Patrol mobile app, complete with picture(s)
- Offers real-time patrolling monitoring features.

System & Data Management

- Offers easy and automatic daily full system data backup and simplified full system recovery
- User selectable ODBC compatible database is used to meet the enterprise level requirements, e.g. MySQL
- · Supports different levels of user privilege settings; Admin, Client and Guards.
- Provides an average length of 3 years data storage.

Benefits of TimeTec Patrol

- · Automation of tasks, promoting efficiency
- Effective BYOD concept
- · Accurate reports to present to clients
- · Gauge productivity of guards effectively
- Cost-savings measure

Viewing & Scheduling Patrol Data Collection Processing, Reporting & Editing

HR staff handles security guard

Security manager can configure security patrol rules and assign guards on duty at specifically intended sites

HEADQUARTERS

and approves

the reports.

Patrolling in a Single Location

Collecting Patrol Records From One Location

Security guards report their patrolling duties using mobile app, which will capture their patrolling records including checkpoint IDs, dates, times and GPS locations to be sent to TimeTec server.

Multiple Locations Patrolling

Collecting Patrol Records from Multiple Locations

Company can assign guards in multiple locations for patrol duties. Mobile app will capture all the patrolling records including checkpoint IDs, data, times and GPS locations from all locations to be sent to TimeTec server.

Security Managers or Supervisors at Remote Site/Home with Computers/Mobile App

Real-time Monitoring and Automatic System Alerts

Managers and supervisors can login to overview the entire operations in real-time. System will send notifications and emails to the person in charge if there's any emergency cases reported by the guards

Customer's Terminals/Mobile App

Customers' Computers/Mobile App Reports and Analysis

Customers can generate analysis reports to justify and optimize their security workforce manage-

These reports also provide a better overview to managers and supervisors, to improve the patrol rules, providing a secured environment for their

Reporting & Editing

Employees' attendance data is valuable for companies, as the data can be used to generate relevant reports to help manage your business.

- Provides real-time data for managers to have access to the information required before making an informed decision.
- · Report Layout is configurable and customizable.
- · Provides preconfigured reports such as monthly patrol report, incident reports and more based on patrolling data.
- Multiple filters to ease report generation
- Reports can be generated in pdf, xls, doc and rtf
- · Sort reports by patrol location for easy patrol data manage-

Interface with Third Party System

TimeTec Patrol has an open architecture, enabling it to provide maximum flexibility for integrating time and attendance information with your existing system.

Manual data export: The structure of the export data table is customizable according to different fields, field length and column sequence to simplify data processing for third party use.

These are the features that are available in the mobile app:

Guards on duty are able On duty guards can report any incidents to view all routes and checkpoints assigned to instantly to their them before each patrol.

Guards can push the Panic button during emergency to trigge

jobs for guards on duty.
